

Cell Type Composition by Region

Comparing marker-positive vs. all-negative cells

dACC

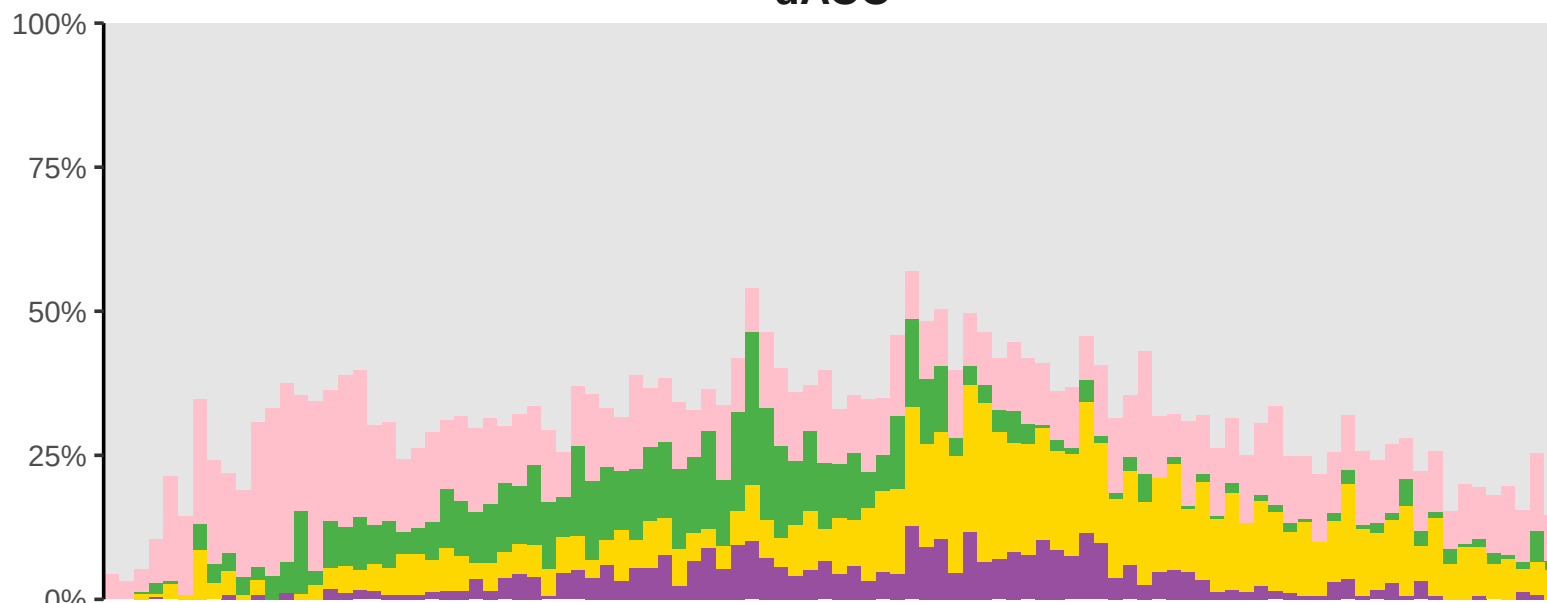

dIPFC

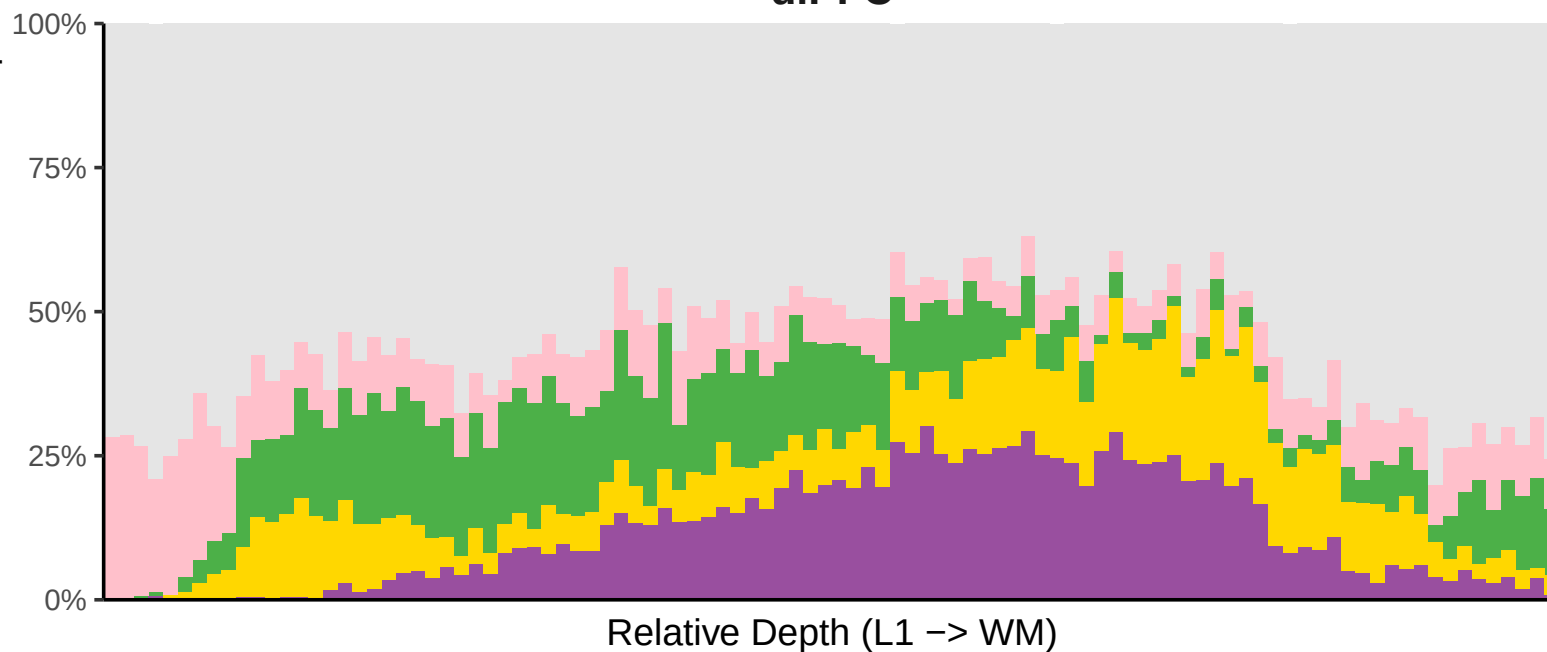

Spatial Cell Type Composition across X-Bins

Stacked proportions including Negative (all-marker 0) cells

dACC

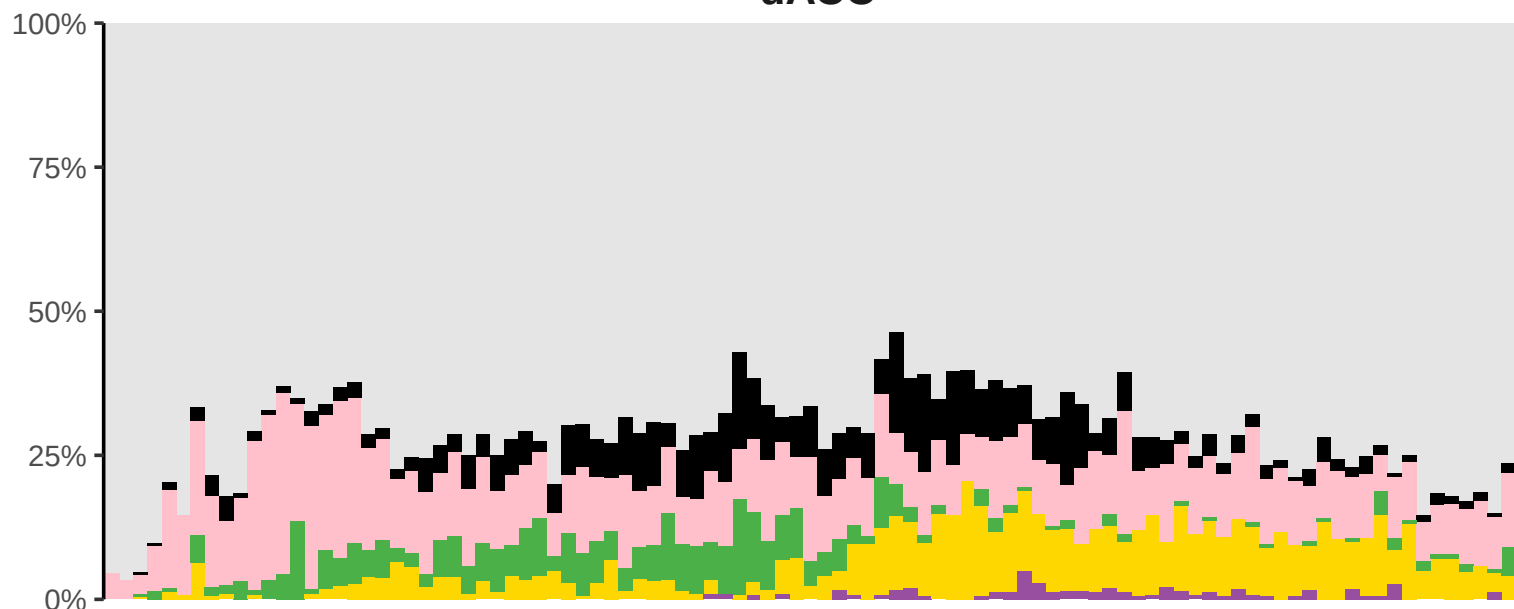

dIPFC

True Spatial Cell Type Composition across X-Bins

Stacked proportions including Negative (all-marker 0) cells

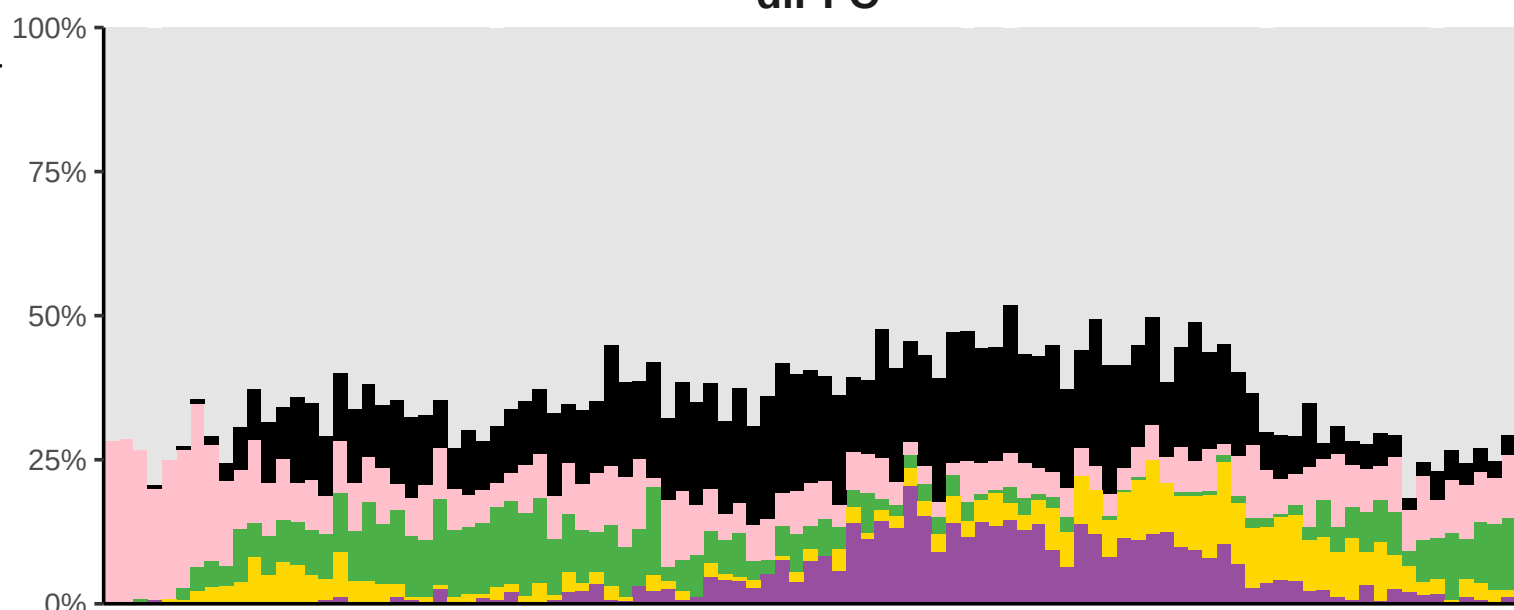

dACC

Cell Type

- Negative
- Multi-Positive
- AQP4+
- ADCYAP1+
- PCP4+
- RORB+

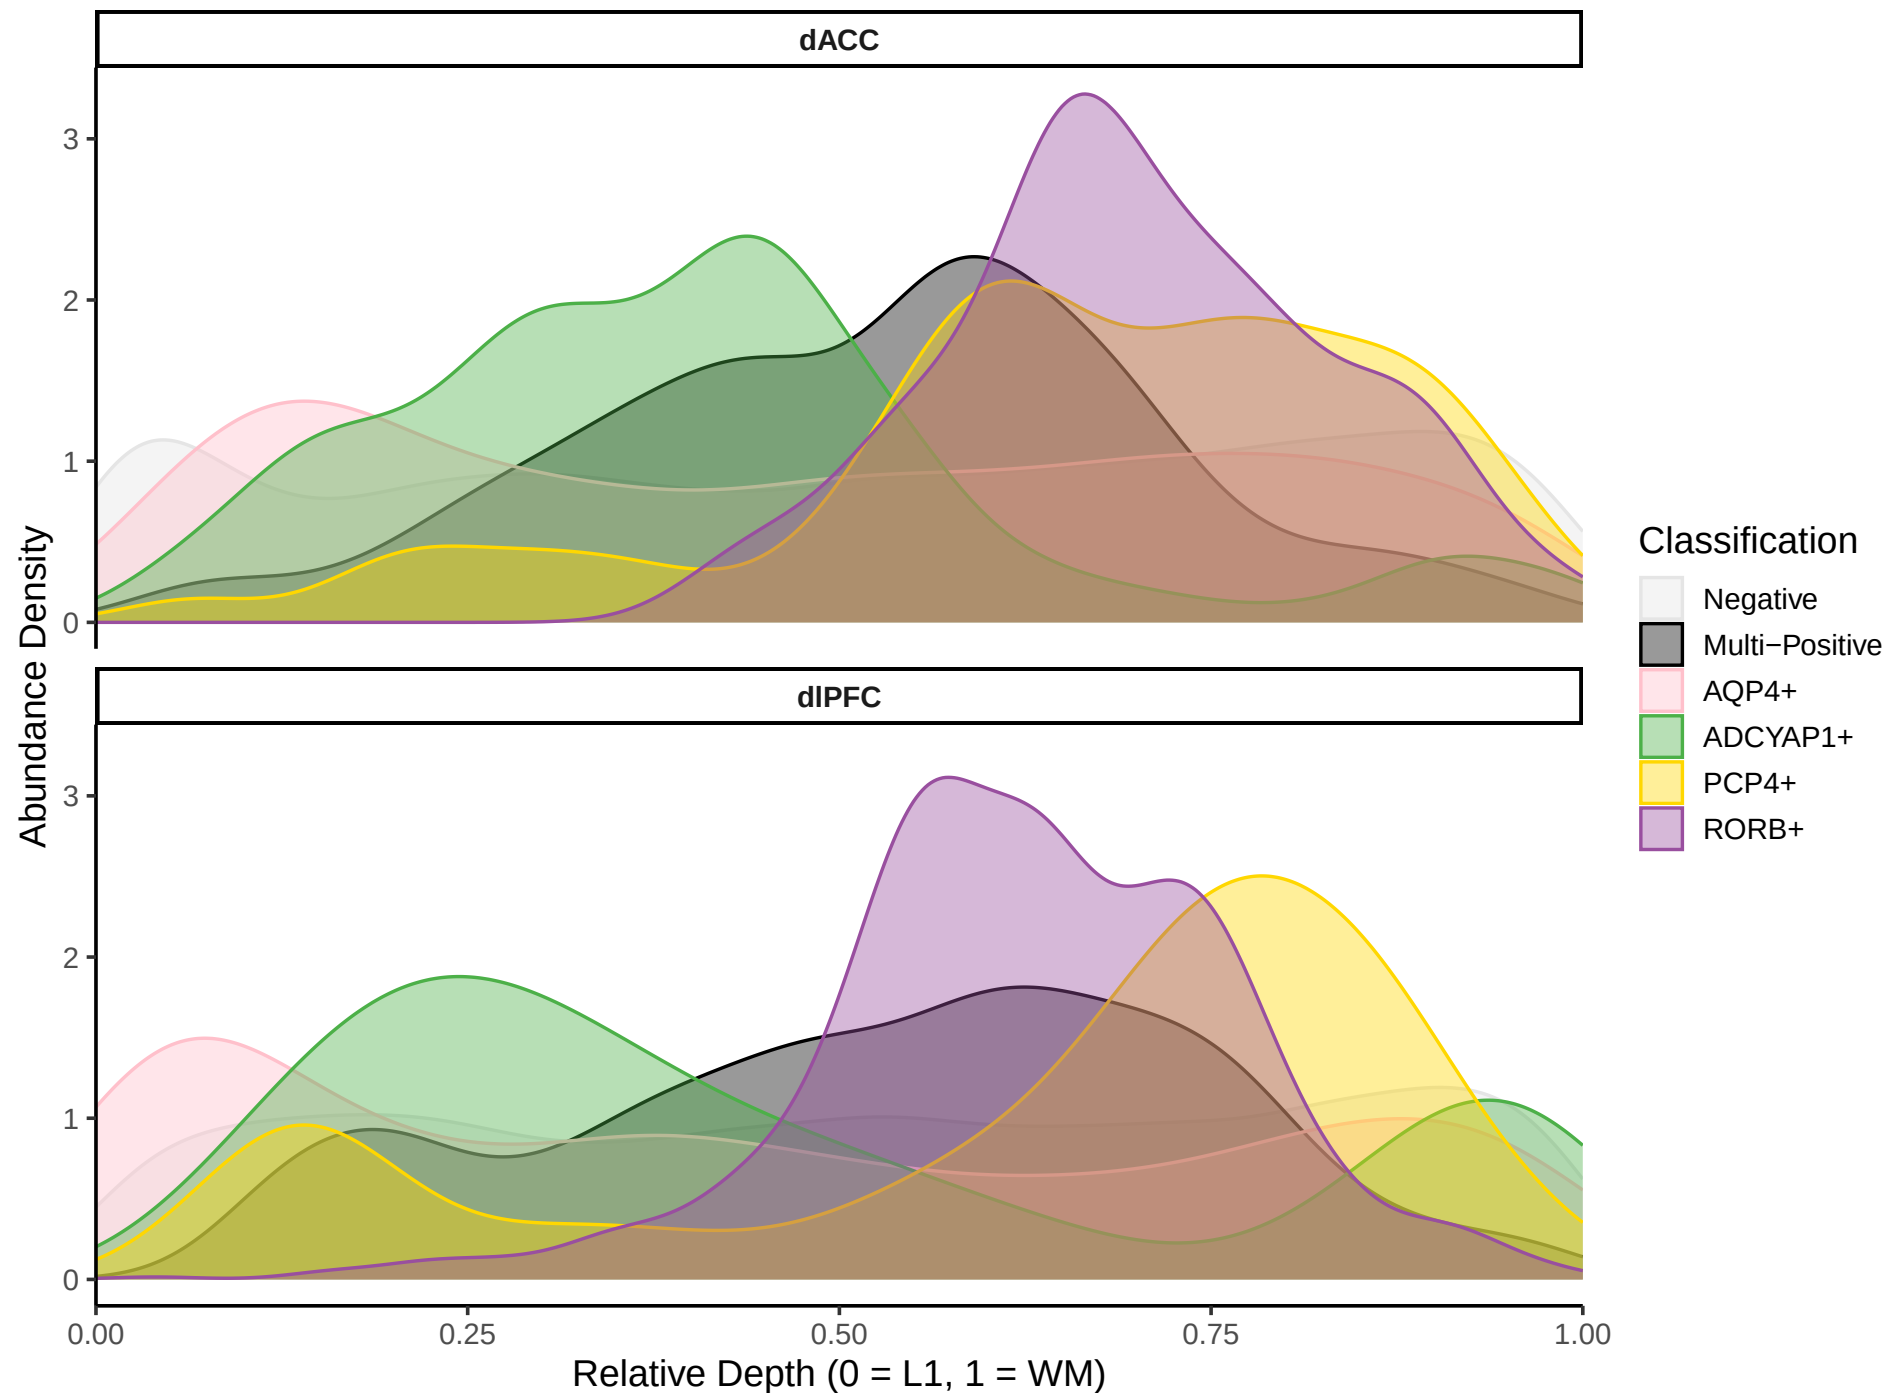

dIPFC

Relative Depth (L1 -> WM)

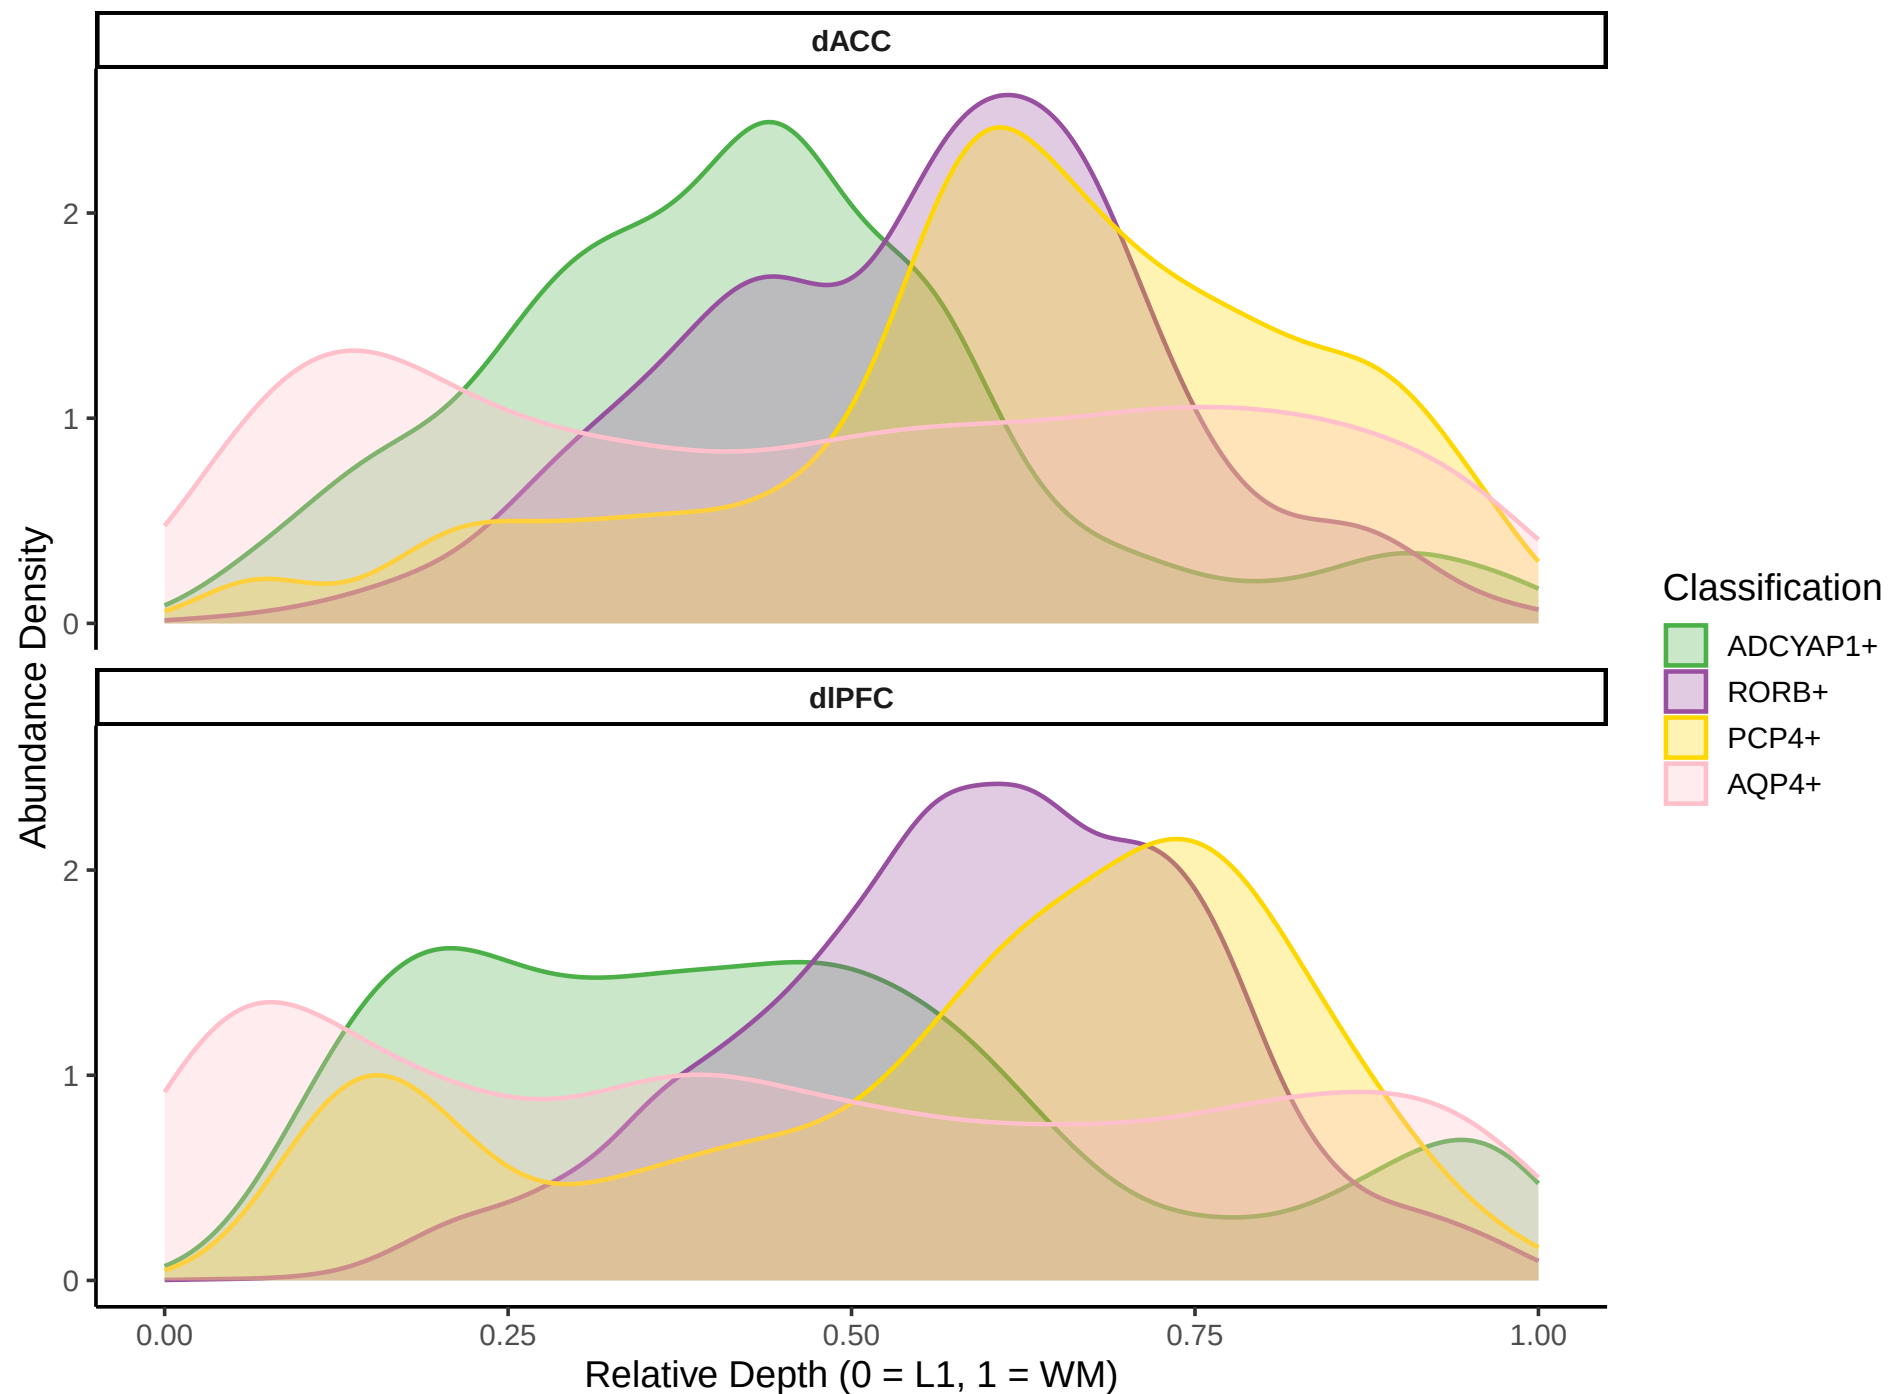

Spatial Density of Mutually Exclusive Cell Categories

Area under curves sums to 1.0 (100% of cells)

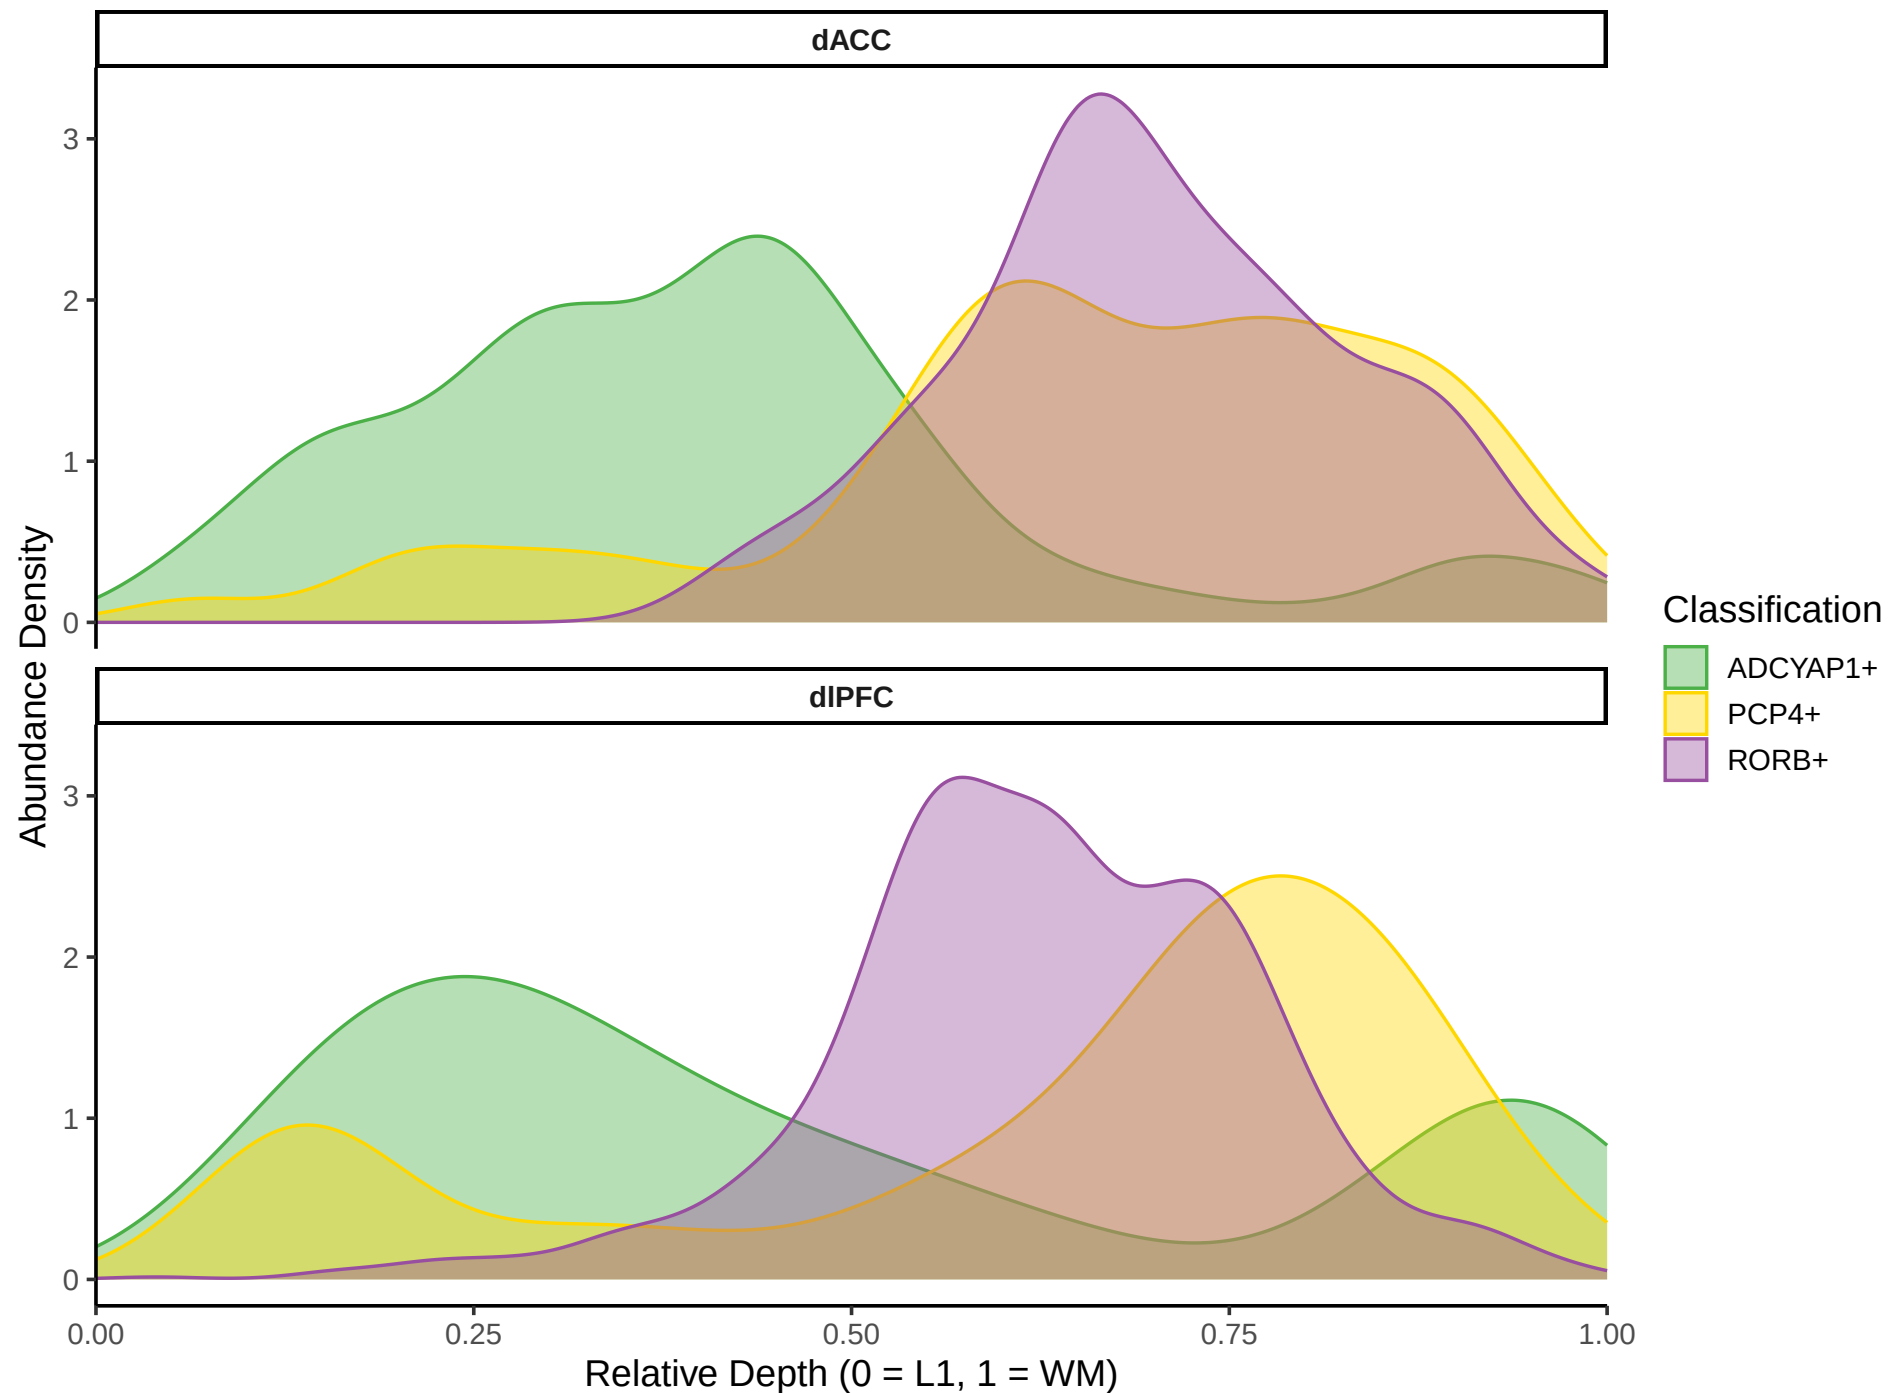

Spatial Density of Positive Cell types only

Area under curves sums to 1.0 (100% of cells)

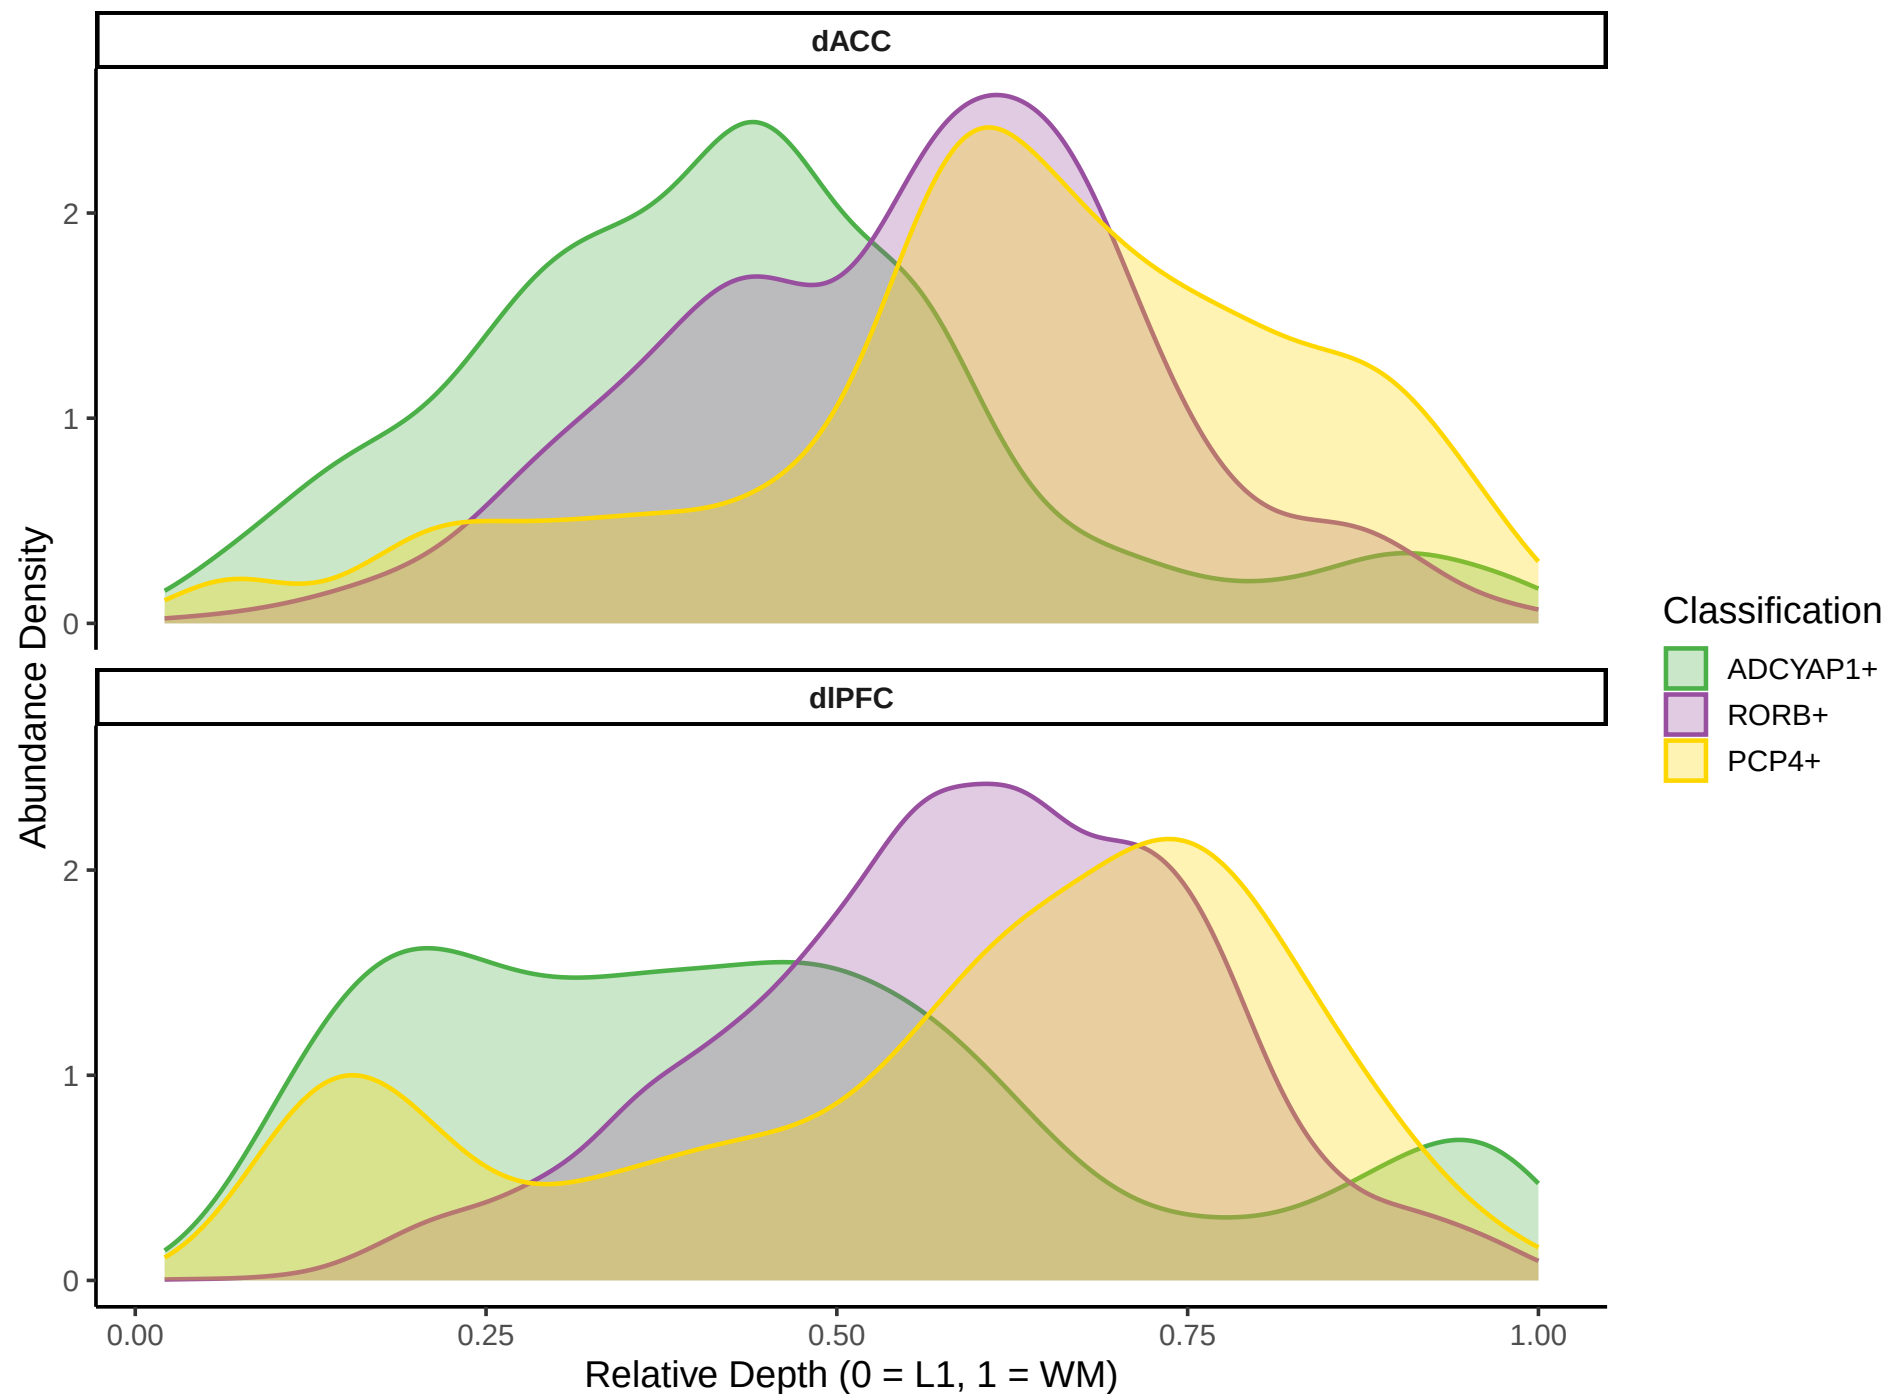

Spatial Density of Mutually Exclusive Cell Categories

Area under curves sums to 1.0 (100% of cells)

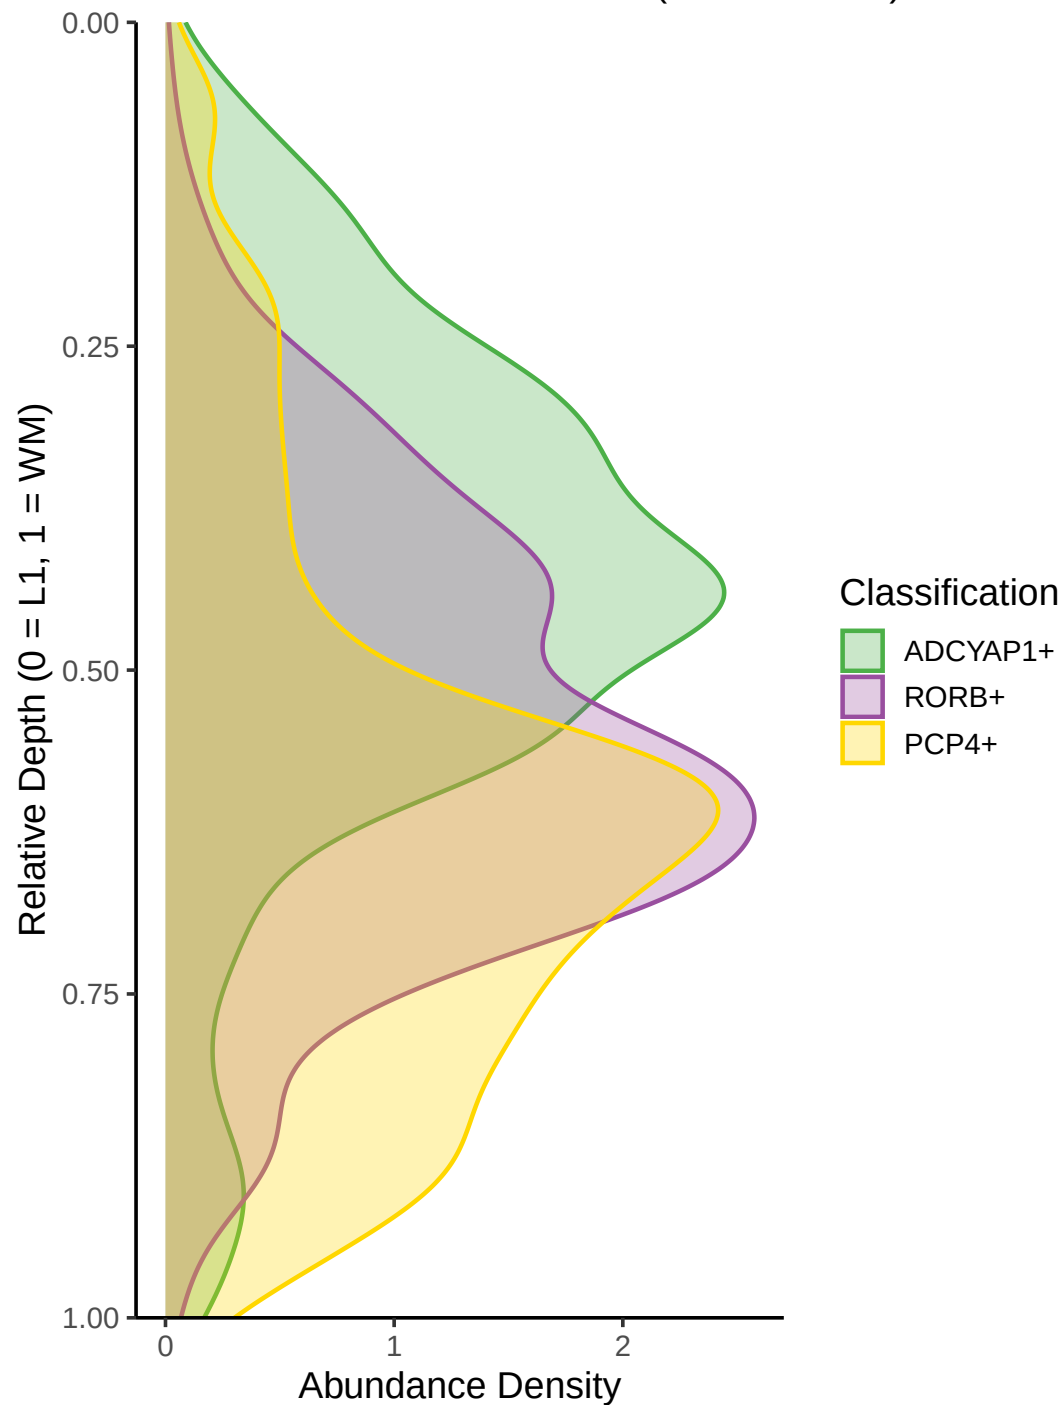

Spatial Density of Positive Cell types only

Area under curves sums to 1.0 (100% of cells)

Spatial Density of Positive Cell types only

Area under curves sums to 1.0 (100% of cells)

Spatial Density of Positive Cell types only

Area under curves sums to 1.0 (100% of cells)
